MINIATURE DECORATIVE AND WATERLILY DAHLIAS

For cutflowers and all 'round satisfactory performance in your garden, these types are unsurpassed. WATERLILY DAHLIAS ARE MINIATURE DECORATIVE TYPES WHICH HAVE SOMEWHAT THE APPEARANCE OF WATERLILIES, AND TEND TO CUP AND CLOSE AT NIGHT. CULTURE IS IDENTICAL WITH ALL OTHER DAHLIAS. All the varieties offered here are fine cutflowers and at least several should be in every garden. Flowers are about twice the size as shown in the picture, and one plant may bear up to several hundred blooms in one season.

MELODY. Orchid. • GLORY OF HEEMSTEDE. Yellow.
GOLDEN LEADER. Gold. • GERRY HOEK. Pink. • IKE. Red.

ENTIRE COLLECTION \$250

OF THE ABOVE 5 CUT FLOWER DAHLIAS (Reg. value \$3.00)

- FAIRY.** Soft pink. 5' to 6'. \$.50
FLORIST. Excellent little cutflower. Pure lilac. 4' to 5'. New from Holland. . . 1.00
GERRY HOEK. Rich pink with slight yellow shadings at the center. By far the most popular cutflower dahlia of any type ever grown. A very profuse blooming dahlia with long, strong stems holding the flowers erect. Everything about this dahlia is outstanding and we cannot recommend it too highly. See illustration. 6'. Waterlily type50
GIMPEL. A very unusual "freak" flower much admired and ordered in our garden. The color is a blend of red, pink, and white with the predominating color varying even on the same bush. 5'.50
GLORY OF HEEMSTEDE. This clear bright yellow waterlily is the best addition to this class for several years. The flowers are held very upright on cane-like stems. Sometimes has semi-double flowers. See illustration. 6'.75
GOLDEN LEADER. A pure gold which will last for days when cut, even in the hottest weather. Can be grown to 6" to 7" diameter if disbudded. See illustration. 4' to 5'.75
HELLY BOUDEWIJN. An early blooming pure white in the waterlily type. Tall 6' bushes are covered with blooms all season long. Sometimes comes semi-double late in the season.50
HONSHU SCARLET. Bright fiery scarlet red contrasting strikingly with a rather dark green foliage. 4'.50
IKE. Free blooming blood red. Long stems. 6'. Illustrated.50
JOKE. Dark red and white. Petals recurve to stem. 3'.50
KATHIE M. Old rose and cream. 4'. . . .50
LILY BELLE. Very delicate light satin pink. Good keeper. 4'.50
LITTLE SISTER. Bright red with white tips. 5' to 6'.50
MELODY. Delicate rosy lavender. Low 3' bush with hundreds of blooms. Illustrated.50
MOUNTAIN SUNSET. Fiery orange red. 4' bush.50
ORCHID LADY. Beautiful orchid shade. Profuse bloomer. 4'.50
PURPLE QUEEN. Rich royal purple uniformly tipped white. 3'.50
RED MICKEY ROONEY. A rich deep red waterlily type which produces an amazing number of flowers, the 5' bush being simply covered all season. Early blooming.1.00
SATSU. Cherry red, almost ball shaped. 5'.50
SPIRIT. Maroon and white bi-color. Very attractive. 4'.50
SPRINGHILL ROSE. American Beauty rose-red. Tall 6' bush covered with blooms. One of the finest garden plants. .50
SUNNY. Rich golden yellow. 4' bush with many flowers.50
THE WIZARD. Small very formal purple evenly tipped white. A sure eye-catcher. Highly recommended for those who like bi-color dahlias. 4'.50
WHITE FAWN. Best pure white miniature. Blue ribbon winner. Sturdy 3' bush with good stems and loads of flowers.

TERMS OF SALE

1. All bulbs are fully guaranteed to be true to name and free from disease and any which prove otherwise will be replaced cheerfully upon return.
2. Due to the increased postal rates we ask that you include 25c with each order. In most cases this does not take care of the total postage but helps take care of the increase.
3. C.O.D. shipments are NOT ACCEPTED. They cost you more, and mean much work for us.
4. Delivery in Southern United States will begin March 1st. Orders shipped

earlier on request, and on customer's risk against loss from freezing. Shipments to Northern United States will begin April 15th. These dates are the earliest practicable for planting in their respective areas. (In Oregon we plant from the 15th of April to the 15th of June with fine results.) Dahlias should be planted about 90 DAYS PRIOR TO THE TIME YOU WANT THEM TO BLOOM.

5. NO ORDERS SHIPPED AFTER JUNE 10th. Orders received after that date will be held for the following year unless otherwise specified.
6. ORDERS ARE HANDLED PROMPTLY IN THE ORDER THEY ARE RECEIVED.

GROWING DAHLIAS

PLANT after danger of frost. Hole about 6" deep. Set stake at planting time. Thoroughly mix in cup of bone-meal or rotted manure. Place tuber flat with sprout up. Cover lightly. Fill in as plant grows.

WATER well when you plant and give thorough soaking every week to 10 days after.

FERTILIZE with one good application of barn manure and several light applications of commercial when blooming.

CONTROL BUGS with DDT or Lindane for thrip, Leaf Hoppers, and cucumber or spotted beetle. Tobacco dust or spray for aphids. Parathion for Red Spider mites.

CUT FLOWERS late afternoon or early morning. Boil stems 90 seconds then immerse in deep water in cool place several hours before arranging.

DIG DAHLIAS late in fall, usually after frost. Lift carefully and store in cool (35° to 50°) place. Inspect monthly. If tubers shrivel, storage is too hot and dry. Mold can be controlled with ample ventilation.

HOW TO GROW GLADS

Plant in full sun. Space bulbs about 4" apart in the row or bed, and plant about 5" or 6" deep. Any good garden soil will grow glads. Rotted manure is desirable at the bottom of the hole with a little dirt between this and the bulb, or a side dressing of commercial fertilizer (3-10-10) will do. Water well during growing period. Use 5% DDT or 1% Lindane dust or spray for control

of thrip. Apply every 2 or 3 weeks during growing period. The bulbs you receive have been treated for thrip but it is essential that you dust during the growing period as this insect can drift in. Dig bulbs in fall after flowers are gone and foliage has turned brown. Dry for 2 to 3 weeks, remove old corn, and store in cool, dry place.

CHRYSANTHEMUMS--Color Unlimited

HARDY ENGLISH CHRYSANTHEMUMS

HARDY ENGLISH CHRYSANTHEMUMS

English mums have been gaining more in popularity for the last several years than any other type because of their early blooming habit and large flowers. With disbudding and proper feeding flowers 5" to 6" across can readily be had. Without disbudding flowers will still be substantially larger than those of other standard types. The plants in this well balanced selection are all grown from outdoor raised stock and will delight the connoisseur as well as the beginner.

CUSHION CHRYSANTHEMUMS

These attractive gay little mounds of flowers are among the easiest of all chrysanthemums to grow and have no superior in the garden world for borders or large rock gardens. They are also marvelous for mass effects and are extensively grown as potted plants. Their early blooming habits delight the gardener in the Northern part of the United States where fall storms frequently interfere with proper blooming of later blooming types. Cushion mums can very successfully be left in one spot for several years with larger and more spectacular displays of glorious color as the plants become larger. Try some of these compact little beauties this year and use dahlias of a complimentary color for a background. We guarantee you will be overjoyed at the results and the long blooming period offered by both flowers.

CUSHION MUMS

HOW TO GROW CHRYSANTHEMUMS

Rooted cuttings such as you receive when you order any of the mums offered on these two pages will develop better plants and produce nicer flowers than undivided clumps grown from year to year. They like rich soil and good drainage is imperative, as it is for practically all flowers. A mixture of sand, leaf mold, and rotted manure is ideal, but any material which will loosen the soil is satisfactory. (If sawdust is used be sure to add nitrogen.)

On cushion mums pinch out the top of the plant after it is well established to aid in inducing branching. On the other types pinching and disbudding is more or less optional although it is, of course, necessary if you wish maximum flower size. Plant in full sun for best results. If used as a border plant along the house a southern or western exposure will give much better results than if they are planted on the east or north sides.

SPOON MUMS

WORLD'S FINEST BEGONIAS!

Again we bring you the choice California Begonias which we featured last year. Do not confuse these with cheap, inferior imports. These bulbs are the best money can buy.

CULTURE

Place tubers on moist peat to start them; when top growth is 2 to 3 inches high, transplant to pots or beds under trees or in partial shade. A good soil mixture: 1/3 manure, 1/3 coarse sand, 1/3 leaf mold or peat moss. When blooming is finished dry off, dig and store in dry peat. Tubers may be used over and over again.

OLD FAVORITE MUMS

Included in this collection are early blooming pompon, button, Korean, and decorative types which have been popular garden favorites for years and years. They produce a profusion of beautiful flower sprays, and with the early flowering varieties offered here you will have fine blooms from late summer until the killing frosts of early winter. (Here in Western Oregon we frequently have fine blooms in December.) Order this collection today. You will get a carefully selected assortment in a wide range of colors guaranteed to please.

SPOON CHRYSANTHEMUMS

These delightful mums remind one somewhat of a cactus dahlia except that the ends of the tubular petal flattens out into a tiny spoon. They are uniquely artistic and especially delightful for flower arrangements. In some varieties the spoon is the same color as the tube and in others there will be a variation in shade. Bushes average 3' to 4' in height.
